DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

On page 13, line 13, the reference to "FIGURE 7" should be --FIGURE 8--.

On page 14, line 9, the reference to "FIGURE 7" should be --FIGURE 8--.

Appropriate correction is required.
2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:
 - (1) The specification does not describe the upper and lower thresholds recited in claim 5.
 - (2) The specification does not describe the upper threshold based on the noise levels recited in claim 6.

Claim Objections

3. Claim 3 is objected to because of the following informalities: Claim 3 is incomplete.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
5. Claims 5 and 6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 5 is directed to upper and lower thresholds. However, the specification only describes a single threshold (page 13, lines 11-14).

Art Unit: 2662

Claim 6 is directed to the upper threshold based on noise levels. It is not clear what is meant by this limitation since the specification does not describe this feature.

Allowable Subject Matter

6. Claims 1-4 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to anticipate or make obvious the particular method of determining the connectivity of switches in a computer network.
